1 Introduction

Welcome to my $\text{\LaTeX}$ document. For example's sake, I will tell you what I did this weekend. Hopefully this brings you a bit of joy, as it was fun for me to write too.

2 Friday

2.1 CSC 4880

Friday was a bit crazy. I had my **8 AM** class of Artificial Intelligence, *CSC 4880* now on the semester system. Unfortunately, the professor is extremely dull and the slides are *disastrous*! However, I had my coffee and pre-blended smoothie, so I kept myself somewhat entertained.

2.2 CSC 3665

Then I had *CSC 3665* from **12PM - 2PM**. I actually am enrolled in the **5PM-7PM** section but on Fridays have the availability to go *earlier*! My professor is quite intellectual and speaks in large fluent sentences, but overall great.

2.2.1 the lab

He assigned a lab which gave me a bit of fright, but we will get to that.

2.3 Driving

Now comes the fun part of my Friday! I had booked a concert, **5 Seconds of Summer** for the first Friday of the school year. I saw them earlier this summer too back at home in **Minnesota**. This was quite the drive (3-4 hours), as it was in Mountain View, CA. I got my two friends (for confidentiality, we will call them Mary and Jane), and we started the long trek. See (??) for a mathematical analysis.

2.3.1 In n Out

About an hour from the venue, Mary routed us to an *In and Out*. Ironically, it was in the same plaza where I had stopped for a bathroom break for a separate concert on July 3rd in *Pleasanton, CA*. Completely unintentional but quite funny. I ordered a double double and chocolate **milkshake**.

2.4 5 Seconds of Summer

This would be my 5th time seeing 5 Seconds of Summer (say that 5 times fast)! It was incredible, I cried so much, lost my voice, and laughed a lot too. Mary and Jane had never seen them and were not prepared for the chaos that unfolded, but by the end, I had them falling in love with my favorite band too.

It ended around 11 and we were on the road home for about another 3.5 ish hours.

3 Saturday

This drive continued into Saturday, we reached a *Starbucks* right around 12am, *maybe 12:15am*. I was already falling asleep but I kept awake and Mary and Jane kept me talking as to avoid any not good driving mistakes. After dropping them off I went to park my car: **3:30 AM** had it...

3.1 Post sleepy time

I woke up around 2pm, and was ready to start the day. I met up with a friend who I'll call Bret to work on the **aforementioned lab**. We worked diligently for about 3 hours, and then journeyed to a pseudo-party like event that was an art show from my tattoo artist. I got a delicious burger, enjoyed some music, and *fell asleep* soon after leaving

4 Sunday

I then woke up at **7:30am** for a coffee-meet-up thing with 3 other friends. That was the **ONLY** time that worked for everyone! This is getting quite long so I will sum up everything else in bullet points.

- I went and played pool for 2.5 **HOURS**
- then went to the gym
- then more billiards for another 2.5 **HOURS**
- and then a large portion of meal prep, laundry, and housekeeping before bed

A section of latin!

This is an unnumbered section. Playing with paragraph breaks too.

Little did you know, I took latin for 10 years and now I cannot speak a lick of it!

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at,

mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

5 More Formulas

I do not know how to tie an equation into this story, but here is my attempt:
I could calculate my exact time on the way back from the concert using

$$T = \frac{D}{S} \tag{1}$$

this boils down to

$$T = \frac{198}{65} \approx 3.046 \text{ h}$$

which, If I never stopped driving and always went 65 mph, would be correct.
